MSc/ MRes in Neuromuscular Diseases

UCL Institute of Neurology will launch a new Postgraduate Masters Programme starting September 2015.

Our students will be part of a world-leading community of scientists and clinicians working at the cutting edge of translational research in Neuromuscular Diseases. The course is open to scientists, clinicians and allied health professions (nurses, physiotherapists etc) and will consist of taught modules as well as a research project.

Taught Modules include:
- Skeletal Muscle and associated diseases
- Peripheral Nerves and associated diseases
- Motor neurons and associated diseases
- Cellular and Molecular Mechanisms of disease
- Advanced genetic technologies and clinical applications
